**RETURN ON RATE BASE COMPUTATION**

1. The data used in calculating rate base are averages.
2. Calculate those averages by summing the first-of-year and the end-of-year figures for each account and then dividing the sum by two.
3. Note: Do not include property held for future use or construction work in progress with utility plant in service. These are not rate base components.

### Identification and Ownership - Contacts (Page iv)

We are responding to the 2002 Analytical Review Letter dated September 15, 2003. We apologize for not responding sooner, but the municipality sent the letter to us and it got mixed in with their monthly bookkeeping information.

1. The \$425 reported in Account 271 is a payment from a resident for a new construction of a water service. This service has not been added to schedule W-16 because the service was not installed by the utility until 2003.

2. 350 services and 331 meters in use were reported in 2001. Unfortunately, the wrong number of meters or services has been carried forward for a number of years. The municipal employees are going to look into reconciling the numbers on the PSC report to their utility billing software, any adjustments will be made on the 2003 PSC report.

3. The municipality has a new "operator in charge" who is working on leak detection. Also, the new operator feels that the compilation of the number of gallons used for flushing, etc. was not done accurately in the past and developed a more accurate system. The operator and the utility employees are all aware of the the water loss problem in 2002 and they feel that the water loss so far in 2003 is below 25%.

4. We will change these residential meters to commercial.

5. \$666 is reported in Account 421 as insurance recoveries. During 2002, equipment was damaged and replaced. Insurance money was received for this damaged equipment.

If you have any additional additional questions, please feel free to contact us.

Sincerely,

Toni Oian, CPA

Dear Mr. Olson:

The Public Service Commission (Commission) staff has completed its

analytical review of your utility's 2002 annual report. The primary purpose of the analytical review is to detect possible reporting or accounting related errors and also to identify significant fluctuations from prior years' data that are not sufficiently explained in the annual report. The analytical review did identify the following issues:

1. On Page F-17, \$425 is reported in Account 271 for a water service contribution. Who contributed this amount and what was the basis of charging this amount (i.e. Cz-1, special assessment, etc.?)
2. On Page W-16, 350 services are reported in use, with 0 services not in use. On Page W-17, 331 meters are reported in use (end of year less in stock). Please explain why there are 19 more services in use than meters.
3. On Page W-10, the water loss is reported as 34% and the explanation is that it does not include fire gallons for a lot of fires fought in 2002. What is the water loss year-to-date in 2003? Has it been reduced below the 25% maximum? We are enclosing Attachment A which contains methods for reducing water loss. If your water loss is still above the 25% maximum, please inform us what steps you are taking to reduce water loss.
4. On Page W-17, two residential meters are reported. A footnote to this schedule indicates that these are for apartment complexes. These meters should be classified as commercial. Only duplex apartments are classified as residential.
5. On Page F-2, an amount is reported in Account 421 described as "insurance recoveries". Please provide more detail explaining this amount.

**PROPERTY TAX EQUIVALENT (WATER)**

1. No property tax equivalent shall be determined for sewer utilities or town sanitary district water utilities.
2. Tax rates are those issued in November (usually) of the year being reported and are available from the municipal treasurer. Report the tax rates in mills to six (6) decimal places.
3. The assessment ratio is available from the municipal treasurer. Report the ratio as a decimal to six (6) places.
4. The utility plant balance first of year should include the gross book values of plant in service, property held for future use and construction work in progress.
5. An "other tax rate" is included in the "Net Local and School Tax Rate Calculation" to the extent that it is local. An example is a local library tax. Fully explain the rate in the Property Tax Equivalent schedule footnotes.
6. The Property Tax Equivalent to be reported for the year is determined pursuant to Wis. Stat § 66.0811(2). Report the higher of the current year calculation or the tax equivalent reported in the 1994 PSC annual report, unless, the municipality has authorized a lower amount, then that amount is reported as the property tax equivalent.
7. If the municipality has authorized a lower amount, the authorization description and date of the authorization must be reported in the Property Tax Equivalent schedule footnotes.

**HYDRANTS AND DISTRIBUTION SYSTEM VALVES**

1. Distinguish between fire and flushing hydrants by lead size.
  - a. Fire hydrants normally have a lead size of 6 inches or greater.
  - b. Record as a flushing hydrant where the lead size is less than 6 inches or if pressure is inadequate to provide fire flow.
2. Explain all reported adjustments in the schedule footnotes.
3. Report fire hydrants as within or outside the municipal boundaries.
